

IKON SPORT

The IKON Sport was developed to appeal to the active lifestyle, for people who require maximum support and recovery. Measuring a generous 26cm in depth, medical grade reflex foam offers ultra support and weight distribution without compromising on breathability. With dual castellation for improved ventilation, the mattress is topped off - literally - with a removable, washable top cover for easy cleaning. The IKON Sport with advanced air channels and medically inspired pressure relief technology caters perfectly to those who have previously been overlooked and feel let down with traditional mattress choices.

Pressure Mapping

Technology that enables even body weight distribution across lighter and heavier parts of the body, eliminates strain and discomfort and delivers an undisturbed, supportive sleep.

Air Core

Open cell sleep technology throughout the entire design. Providing a fresh, cool sleeping environment no matter the temperature.

Removable Zip Top

Designed with the user in mind. The removable top cover allows easy washing, no more struggling with a large cover. Easy, quick and simple.

Medical Design

Taken from our latest innovations in the medical sector, the dual castellated design provides optimum pressure relief and promotes blood circulation.
